Video Downloader allows you to download videos from any sites. It supports downloading videos from YouTube, Google Video, Google, Yahoo! Video, Yahoo! Movies, Dailymotion, Metacafe, MySpace Video, Veoh, Hulu, Vimeo, Facebook Video, Photobucket, Cinemagram, VK, Break, Pandora, CNET, AOL, and many more sites. You can download videos in video/flash or HTML5 formats. It's a lightweight software application designed with a single goal in mind: to help users download videos from YouTube. Simple Video Downloader is a clean and simplistic layout that allows you to perform most operations with just a few clicks. It sports a clean and simplistic layout that allows you to perform most operations with just a few clicks. What's more, the program is able to provide basic video details, such as the

name of band or artist, song title, and images. By default, the utility automatically saves the downloaded items on your desktop, so you cannot manually pick the saving directory. The lack of configurable settings can be good new only for rookies, as they can learn to set up the dedicated parameters with minimum effort. However, professional users may find it pretty inconvenient to work with a tool that doesn't come packed with advanced features, such as Clipboard monitoring options, batch processing, previewing mode, and video quality selection (e.g. high, low, medium), just to name a few suggestions. During our testing we have noticed that Simple Video Downloader needs up to several minutes to carry out the downloading task. As it would be expected from such a small utility, it remains light on system resources, so it doesn't hamper computer performance, nor

interfere with other programs' functionality. To sum things up, Simple Video Downloader offers a simple software solution when it comes to helping you download videos from YouTube. It can be easily configured and installed by all types of users, regardless of their experience level.
