How To Use Photoshop Text Just like you can create shapes in vector graphics, you can also use text in photoshop. One of the ways you can create custom text in Photoshop is to use a canvas window that's slightly larger than the body of your text. If you open this window, you'll get a rectangular box you can work with. You can use the type tool to create or modify custom text. When you finish your text, you'll see a background fill that's slightly pink. You can change this background color by clicking the pink area. You can also change the font style of your text in the same way, by clicking the button that's to its left. Note: you can't save your text.
